

Economic Recovery Following the Flooding in Rio Grande do Sul

Information

This infographic presents economic recovery data for the municipalities of Mucum, Roca Sales, and Encantado in Brazil. Each line represents the amount of business-related posts on Meta pages, serving as a proxy for economic activity in different sectors. The pre-disaster activity level is used as a reference.

- **Red dotted line at 0.5:** Indicates the regular activity level before the disaster.
- **Values near 1:** Indicate that the sector is experiencing higher-than-normal activity.
- **Values near 0:** Indicate that the sector is experiencing lower-than-normal activity.
- **Sectors in bold red:** Indicate sectors that remain below the 0.5 line, showing they have not yet returned to pre-disaster activity levels.
